

SEATBELTS

ARE

Sexy

Most everyone will be in at least one car crash in their lifetime. While a safety belt won't prevent that event, wearing one during a crash can double your chances of walking away alive and without serious injury.

- 3 out of 4 of Missouri college students always wear their safety belts.
- Safety belts save approximately 15,000 lives every year.
- Safety belts should always be worn! Airbags are designed to work with safety belts, not alone.
- Almost anywhere you drive, it is illegal not to wear your safety belts.
- One person in the car not wearing their safety belt can endanger the life of every one in the car - even those who are buckled up. As a driver, be sure to wait until all your friends are buckled up before putting your car in gear.
